Surabaya, Indonesia, 60274

Full Stack Developer with 7+ years of experience building enterprise web applications on microservices architecture using C# (.NET), Vue.js, and Angular. Experienced in optimizing large-scale databases and gathering requirements directly with users, supported by strong communication and teamwork skills.

Skills

- **Programming Languages**: C#, JavaScript, PHP, Python
- **Web Development & Frameworks**: .NET, Angular, Vue.js, HTML, CSS, Tailwind CSS, WordPress, RESTful API, Microservices Architecture
- **Database & Architecture**: Database Design & Optimization, SQL (MySQL, PostgreSQL, SQL Server), Apache Kafka, Docker
- **Tools & Software**: Visual Studio, Visual Studio Code, SourceTree, GitLab/GitHub, Jenkins (CI/CD), Azure DevOps Server, JasperReports, Figma, MinIO, Microsoft Office (Excel, Word, PowerPoint)
- **Soft Skills**: Requirement Gathering, Effective Communication, Teamwork, Problem Solving, Creativity & Innovation, Time Management

Work Experience

PT. Mitra Pinasthika Mulia - **Surabaya, Indonesia** Jan 2021 - Present
Software Developer (Full Stack)

NG SDMS Project *Jan 2026 - Present*

- Member of the NG SDMS (Smart Dealer Management System) project team, building a next-generation application to replace the legacy SDMS.
- Handle full stack development, covering Front-End with Vue.js and Back-End with C# (.NET) on a microservices architecture.
- Build inter-service communication using Apache Kafka, with PostgreSQL as the database and Docker for containerization.
- Manage version control with GitLab and SourceTree, and CI/CD pipelines using Jenkins.

Enterprise Application Development *Jan 2021 - Present*

- Continued the development and maintenance of the SDMS application in-house after it was previously handled by a vendor.
- Developed the BPKB (vehicle ownership document) control module in SDMS as the sole developer, based on requirements analyzed together with the analyst team and users.
- Since 2026, trusted to handle multiple modules independently, including discussing requirements directly with users; e.g., developing a BPKB upload feature requested by PT Astra Honda Motor (AHM).
- Designed and developed a microservices architecture for enterprise applications consisting of 10+ services, improving scalability and reducing system response time by up to 30%.
- Developed Front-End applications using Angular & Vue.js and Back-End using C# & .NET for internal systems used by 500+ users across multiple branches.
- Optimized SQL Server databases (Stored Procedures, Tables, Views) with millions of records, speeding up report processing by up to 50%.
- Collaborated with Business Analysts to translate business requirements into application features and technical architecture, releasing 20+ features to production.
- Led system testing, validation, bug fixing, and performance optimization, reducing production bugs by approximately 40%.
- Designed and implemented 15+ business operational reports using JasperReports.
- Managed deployments to the testing environment for Quality Control (QC) and supported the operations team in handling escalated issues.

PT. Clientsolve Mitra Solusi - Surabaya, Indonesia Jun 2019 - Dec 2020
IT Vendor for PT. Mitra Pinasthika Mulia - SDMS Application

Software Developer (Full Stack) *Jun 2019 - Nov 2019*

- Completed a 1-month intensive Angular training at the head office in North Jakarta to prepare for Front-End development.
- Developed PT. MPM's SDMS (Smart Dealer Management System) application end-to-end, from Front-End and Back-End to database design.
- Added new features based on user requests, delivering 5+ feature requests.

Application Support *Dec 2019 - Dec 2020*

- Analyzed and resolved an average of 30+ incident tickets per month from SDMS users through a ticketing system, based on priority and complexity.
- Monitored application performance to identify potential issues before they impacted users.
- Traced errors through application debugging and performed data patching to correct input errors.

CV. Green Angelica - Surabaya, Indonesia Jun 2016 - Sep 2016
Web Developer Intern

- Developed and managed WordPress-based websites, including theme and plugin customization, performance optimization, and SEO implementation (URL structure, canonical tags).
- Edited and optimized image assets using Adobe Photoshop to ensure attractive and responsive visuals across devices.

Education

STMIK PPKIA Pradnya Paramita (STIMATA) - Malang, Indonesia Jul 2018 - Dec 2022
Bachelor's Degree in Information Systems, GPA 3.10/4.00

- Thesis: "Web-Based Subur Technology Management System (STMS) Application for Controlling BPKB at Subur Sejati Motor Surabaya"

LP3I - Surabaya, Indonesia Sep 2017 - Sep 2019
2-Year Professional Program in Information Systems

Certifications

Vibe Coding and Venture: Build Your Product, Launch Your Own Startup! - PT Sentra Vidya Utama (SEVIMA) 2026
Offline MOOC, 10 Learning Hours - Surabaya

Data Analyst - Digital Talent Scholarship 2024 - Ministry of Communication and Informatics (Kominfo) Feb - Mar 2024
Professional Academy, 30 Training Hours

Project Data Analysis for B2B Retail: Customer Analytics Report - DQLab Academy 2024

Project Data Analysis for Retail: Sales Performance Report - DQLab Academy 2024

Fundamental SQL (SELECT, FUNCTION & GROUP BY, INNER JOIN & UNION) - DQLab Academy 2024

Python for Data Professional Beginner (Part 1 - 3) - DQLab Academy 2024
